### **DETAILED ACTION**

1. Amendment filed on 10/12/04 has been received. Information Disclosure Statement filed on 10/12/04 has been received.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 11,12, 14,15, 17-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Bosco et al (U. S. Patent no. 2004/0134725).

Friction support surface 18, back surface 17, stem 30,31, rim 60,61

Claims state that the distal end remains in the recess. The distal end of Bosco et al remains in the recess after coupling.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3683

5. Claims 16 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over in Bosco et al.

Regarding claim 16, Bosco et al is relied upon as above. Bosco et al does not disclose performing the stem. It would have been obvious to one of ordinary skill in the art at the time the invention was made to perform the stem as such is merely a design choice.

Regarding claims 20-22, Bosco et al is relied upon as above. Bosco et al does not disclose connecting the shim and backing plate by a snapping-in action. It would have been obvious to one of ordinary skill in the art at the time the invention was made to attach the shim to the backing plate using any well known method as such is merely a design choice.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3683

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
